EXPERIENCE

Python Developer Intern | Infosys Springboard

11/2025 – 01/2026

- Built an **AI-powered image transformation application** using **Python, OpenCV, NumPy, and ONNX Runtime**.
- Enhanced image stylization through **CNN and GAN-based deep learning models**, improving visual output quality and reducing processing time by **25%**.
- Developed **responsive web interfaces** with **HTML, CSS, JavaScript, and TypeScript** to deploy a complete **computer vision and deep learning solution**.

Open Source Contributor | GirlScript Summer of Code (GSSoC) 2026

05/2026

- Contributed to **3 Open-Source Repositories**, submitting **12 Pull Requests** with **9 Successfully Merged**.
- Resolved **Bugs**, improved **Documentation**, and implemented **Feature Enhancements** using **Git** and **GitHub**.
- Collaborated through **Code Reviews, Issue Discussions, and Version Control** workflows to deliver quality contributions.

EDUCATION

Bachelor of Technology in Electrical Engineering (Minor in Computer Science),
AISSMS Institute Of Information Technology Pune

08/2023 – 06/2027
Pune

SKILLS

Backend: Node.js, Express.js, NestJS

Frontend: HTML5, CSS3, Tailwind CSS, React.js

Tools / Platforms: GitHub, Git, Windows, Linux (Ubuntu), MATLAB

Programming Languages: Python, C, JavaScript

Databases: MySQL, MongoDB, NoSQL

Relevant Coursework: Data Structures and Algorithms, OOPS, DBMS, Computer Networks, OS, Machine Learning, Artificial Intelligence

Machine Learning / AI: OpenCV, NumPy, Scikit-learn, CNN, GAN, TensorFlow, PyTorch

PROJECTS

AlignIQ [🔗](#)

- Developed a **React-based Interview Management System** for HRs and recruiters, streamlining candidate interview scheduling, tracking, and recruitment workflows.
- Implemented **React Hooks, Context API, Redux, React Router, and localStorage**, improving application scalability and enabling efficient candidate data management.

Sentiment Analyzer [🔗](#)

- Developed a **Machine Learning-based Sentiment Analysis Web Application** using **Python, Flask, and Scikit-learn** to classify user sentiments from text data with **multilingual support**.
- Built a **responsive frontend** using **HTML, CSS, and JavaScript** and exposed predictions through a **RESTful API**, enabling **real-time sentiment analysis** and seamless user interaction.

MediChoice [🔗](#)

- Developed an **AI-powered Healthcare Cost Estimator Web Application** using **React.js, Node.js, Express.js, and MongoDB**, enabling users to estimate medical expenses based on multiple healthcare factors.
- Implemented an **AI-based Cost Prediction Model** using factors such as **city, hospital ratings, and insurance coverage**, and integrated a **Medical Crowdfunding Feature** to support patients facing financial constraints.

ACHIEVEMENTS

- **Python Foundation Certification (Infosys Springboard)** – Achieved **85%**, demonstrating strong Python fundamentals.
- **HackerRank Problem Solving** – Solved **100+** coding problems, strengthening DSA and problem-solving skills.
- **Event Coordinator, Tenet 2025** – Coordinated events for the college's annual technical fest.
- **Best Solution (Healthcare Category), Tecathon 3.0** – Won the Healthcare Category award at the national-level hackathon.

CERTIFICATES

- Object-Oriented Programming (OOPS) – Infosys Springboard [🔗](#)
- Python – DataCamp [🔗](#)
- React.js - Great Learning [🔗](#)
- NoSQL – Infosys Springboard [🔗](#)
